Summary

Java Backend Developer with 2 years of professional experience in enterprise backend development and nearly 2 years of prior Java training experience. Skilled in building secure and scalable systems, RESTful APIs, and microservices using Java, Spring Boot, Spring Security, JWT, Oracle, and MySQL. Hands-on expertise in requirement gathering, system design, and implementation of enterprise-grade modules. Strong focus on problem-solving, performance optimization, and clean code practices, ensuring maintainable and reliable backend systems. Experienced in Agile methodologies, SDLC processes, testing cycles, and production support.

SKILLS

Backend Technologies: Java | Servlet | Spring Boot | Spring Security | JWT | RESTful APIs | Microservices

Build & Testing Tools: Maven | Gradle | JUnit

Database Management: SQL | MYSQL | PostgreSQL | Oracle | JDBC | Hibernate ORM | Spring Data JPA

Frontend Technologies: HTML5 | CSS3 | Bootstrap 5 | Angular | JSP

Version Control Tools: Git | Bitbucket | GitHub | Azure

API Tools: Swagger | Postman

Dev Tools & Servers: IntelliJ IDEA | Eclipse | VS Code | NetBeans | Tomcat Server

Soft Skills: Communication | Problem-solving | Teamwork | Adaptability | Growth mindset | Work ethic

EXPERIENCE

Arcana Info, Karachi

JAN 2026 - Present

Java Developer

- Developed and maintained enterprise-level Trade Finance modules using Spring Boot (v3.3.7) and Java (v21), ensuring high performance and scalability.
- Working closely with the Trade Finance team at Meezan Bank Head Office on import/export banking workflows, including Letter of Credit (LC) processing, payment handling, and related financial operations.
- Integrating enterprise systems using ESB and BPM solutions (IBM BPM / LAD BPM) to streamline business workflows and automate banking processes.
- Managing and processing trade-related documents through IBM FileNet, ensuring compliance with banking and regulatory standards.
- Writing and optimizing complex SQL queries to improve system performance, data accuracy, and transaction efficiency.
- Collaborating with cross-functional teams including business analysts, QA engineers, operations, and banking stakeholders to deliver reliable and high-quality financial solutions.

Sapphire Consulting Services, Karachi

JULY 2024 – DEC 2025

Associate Consultant – Java Developer

- Contributed to the development of the MVR (Motor Vehicle Registration) system for the Sindh Government's Excise & Taxation Department, supporting large-scale public sector digital transformation initiatives.
- Led the development of a microservice for secure third-party integrations, enabling seamless communication with external stakeholders and connected systems.
- Designed and implemented secure and scalable RESTful APIs using Spring Boot, Spring Security, and Oracle Database to support vehicle registration and taxation operations.
- Worked on the Tax Collection Module, including backend business logic implementation and complete frontend UI development using Angular.

- Handled sensitive registration and financial data while ensuring secure integrations, system reliability, and compliance with operational requirements.
- Provided development and support services for projects related to Pakistan Reinsurance Company Limited, while collaborating with cross-functional teams to deliver project milestones on time.

Institute Of Imagine Technology, Hyderabad FEB 2022 – DEC 2023

Java Trainer

- Delivered Java programming courses to students at beginner and intermediate levels.
- Designed assignments and hands-on lab exercises using Java SE and JDBC.
- Helped over 100+ students build small Java-based applications and prepare for entry-level developer roles.

PROJECT

Bitbucket

Music Streaming Service (FYP)

A music streaming service that allows local artists to manage and share their music

- Built a full-stack, video-based music streaming platform enabling local artists to upload, manage, and share their content.
- Implemented secure user workflows including JWT authentication, role-based access control, email verification, and OTP-based password reset.
- Developed backend features like video upload with thumbnail, public/private album creation, and user profile management.
- Created responsive UI using Angular, Bootstrap 5 with dynamic components like video cards and album filters.
- Added interactive features such as video view tracking and like/unlike system with real-time UI updates.

EDUCATION

University of Sindh, Jamshoro, Sindh JAN 2020 – DEC 2023

Bachelor of Science, Computer Science

CERTIFICATES

National Vocational and Technical Training Commission NAVTTC	JUN 2021 – DEC 2021
--	---------------------

Oracle Enterprise Resources Planning

National Vocational and Technical Training Commission NAVTTC	MAR 2022 – SEP 2022
--	---------------------

Mobile Application Certificate

Imagine Institute of Science and Technology, Hyderabad	MAY 2022
--	----------

Award for Best Performance in Java Programming
